Beware of Phishing and Email Scams

1. Verify before clicking web links received over emails/SMS
2. Do not open suspicious emails claiming to be from known senders
3. Beware of possible malware in email attachments
4. Never share personal or financial information over the Internet

PASSWORD SECURITY RECIPE

a good password can save the day

INGREDIENTS:
Letters & numbers with a pinch of Attention

INSTRUCTIONS:
Make it unique!
Use initials/final letters from fav songs, rhymes, quotes, books to make it longer, stronger & memorable. e.g.
Phrase: The quick brown fox jumps over the lazy dog.
Password: Tabf0tld@26

Mix it well!
Min 10 characters with a blend of numeric, alphanumeric, uppercase, lowercase with a dash of special characters.

Keep it safe!
Use password managers & multi-factor authentication wherever applicable

EXPERT TIP:
Passwords turn stale quickly. Change them periodically or even at the hint of a suspicious activity.

VERDICT:
There's no scope for a bad password. Some things are better complicated!
