Safe Internet Banking

Internet Banking has provided us with convenience of Banking at our finger tips.

One can perform Banking transactions, check balances in accounts, view records of transactions, pay bills online, view and download statements, etc.

Tips for Safe Internet Banking :

Change your Internet Banking and Transaction password regularly

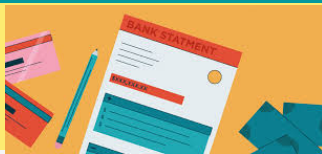

Avoid using public computers and public Wi-fi for logging in

Do not share your sensitive details with anyone

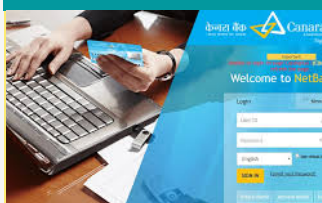

Keep checking your accounts regularly

Always use licensed anti-virus solution

Always ensure that it is Bank's authentic website while logging in

It is safer to use two devices for completing a transaction :-
One desktop/ laptop for logging in & your mobile for receiving the OTP
