

# CYBER JAGROOKTA DIVAS - MARCH 2023

## CYBER SECURITY:

# YOU ARE A TARGET

You may not realize it, but you are a target for cyber criminals. Your computer, your mobile devices, your accounts and information have tremendous value. Cyber fraudsters can pose a serious threat to our data and security. Let us discuss dangers caused, once a hacker takes over your account or device

### USERNAMES & PASSWORDS

Cyber criminals can install programs that can capture keystrokes including your usernames & passwords. This may be used to login to your online accounts

### IDENTITY HIJACKING

Cyber criminals can steal your online identity to commit fraud or sell your identity to others

### EMAIL HARVESTING

Cyber criminals can read your email for information they can sell to others, such as :- all the names, email address and phone numbers in your contact list, details from your personal and work email, etc.

### WEB SERVER

Cyber criminals can turn your computer into a web server, which they can use for hosting phishing websites, hosting attacking tools or distributing pirated videos, etc.

### VIRTUAL GOODS

Cyber criminals can copy and steal any virtual goods in your possession, and sell them to others, such as any software licenses, operating system licenses, etc.

### FINANCIAL

Cyber criminals can scan your system looking for valuable information such as credit card/debit card details, your financial account details, etc.

### BOTNET

Your computer can be connected to an entire network of computers controlled by cyber criminals. This network, called botnet can be used for cyber crime activities such as launching spam mails, DDoS attacks, etc.

### EXTORTION

Cyber criminals can take over your accounts/ devices and demand money. They do this taking over device camera access, or encrypting data on device and demanding payment for decrypting it or tracking browser history and threatening to publish it, etc.

By adopting some simple cyber security tips as below, you can stay safe from such cyber threats:

- Do not share sensitive details with anyone
- Do not click on anonymous links in email, SMS, instant messaging apps, etc.
- Regularly update Operating System and other software
- Use unique and strong passwords
