

CYBER JAGROOKTA DIVAS - JULY 2023

How to spot a Phishing Email?

Red Flags to Alert You to a Potential Phishing Scam

1. Email is sent from a public domain

which looks very similar to our canarabank domain (for e.g., canarabank.org or canarabank.email)

2. The mail content is attractive or threatening

which tempts the user to click the link or download attachments in the mail

3. Look out for caution box

Any mail originated outside our Bank has a caution box attached

4. Unknown Sender

The mail has originated from unknown senders

5. Hover over links to display where URL will lead you

If the real link doesn't match what you expect, assume it is fraudulent and don't click
